YOUR SEGWAY EXPERIENCE

Your Segway session will last 45 minutes approximately and upon your arrival we will get you and your group booked in and organised for the fun that's to follow. Your session includes full briefing and safety equipment (helmets must be worn and are provided other padding is available but optional).

A health & safety briefing will be followed by a 'getting to know the basics' of your Segway X2. After you have mastered the art of moving forwards and backwards, speed control, mounting, dismounting and negotiating corners/turns; you'll be unleashed onto our woodland off-road track (MK site is a purpose built off road track not in woods), designed to test your new found skills before moving finally to our point-to-point circuit where we crank up the speed and put you against the clock to find the fastest Segway rider of the day!

All Segway riders must wear flat shoes and sensible, loose fitting clothing to allow ease of movement.
